OmaCox@me.com

OmaCox.com

As my objectives to be an active and creative force providing clear and decisive leadership for a company's projects, operations, planning and production bringing success and profitability to the company. Provide a strong belief in running projects and company with three principles of Safety, Quality and Success.

Life began after completing my A.A.S in Design from Lamar University in Beaumont, Texas. After graduating joined Flour Engineering, completed their design school and worked across the country. Returning to my home state of Mississippi to build my experience, skills and raising a family.

WORK

Mars Food US

1997 - Present

Project Mgr/Designer

During this time worked on over 68 projects in a range of \$100K to \$1.8M. These projects consisted of process, packaging, site building upgrade and modifications. Including several IT related projects of network infrastructure upgrade. Also managed several projects that where major demolition of abandon equipment and structures. My duties included combination of design and project management along with coordination of design/engineering services and project planning implementing.

Hill Transportation Co.

1995 - 1996

CFO for Startup

This time period was an experience of a startup company. Managed the rapid development of all the computer management systems and definition of corporate standards for operation and auditing. The computer management system required the design, development and installation of network system, and custom software for the company's operation. The development and implementation of the policies and procedures for office and operational management systems, and document retention. The final results from this time period was the completion of the computer and management systems.

Uncle Ben's Inc.

1981 - 1994

Senior Designer

This time period was the development of many skills and methods for the future. Working for a stable of eight engineers. Worked on over 220 design projects and was assigned senior designer for major plant expansion of \$16m for a building and process expansion. These design projects included the introduction of Autocad and all require hardware and supporting connectivity. Also included the development of Project Management software taking a manual ledger method of accounting to a computer based system. Which reduced the reporting time of project spending from 1 month to 1 week. The primary areas of design were conveying systems, process systems upgrades or new installations. Which included all the supporting energy systems and coordinated with control groups aligning them with final mechanical system designs. This included continuing improvements to the processes and many additions to plant's buildings. Also during this time designed and installed a management side

EDUCATION

Corporate Safety Training
2017

Corporate Safety Training

Training in global safety standards for plant construction management and risk analysis and field review procedures.

Washington County
1990
