

LIVE BY THREE STATEMENTS:  
BRINGING IDEAL TO REALITY,  
IF I DON'T KNOW IT, I WILL LEARN IT!  
HUMILITY/CHARITY/MODERATION

As my objectives to be an active and creative force providing clear and decisive leadership for a company's projects, operations, planning and production bringing success and profitability to the company. Provide a strong belief in running projects and company with three principles of Safety, Quality and Success.

Life began after completing my A.A.S in Design from Lamar University in Beaumont, Texas. After graduating joined Flour Engineering, completed their design school and worked across the country. Returning to my home state of Mississippi to build my experience, skills and raising a family. Now located in Arkansas creating new home and enjoying nature.

## WORK

**HGA LLC**  
2019 - Present

**Mars Food US**  
1997 - 2019

**Hill Transportation Co.**  
1995 - 1996

**Uncle Ben's Inc.**  
1981 - 1994

### Sr. Mechanical Designer/Project Mgr - Python/AI Developer

During this time began work as field reviewer of P&IDs for PHA review process to gather data for lead Engineer review. Advanced as lead mechanical for reviewing, checking, and entry into PHA documentation. Which included contacting vendors for equipment and pump data. Drafted procedures for the workflow for mechanical component of the PHA documentation process.

### Project Mgr/Sr. Designer/Construction Mgr /Owner OC Services Inc.

During this time worked on over 68 projects in a range of \$100K to \$1.8M. These projects consisted of process, packaging, site building upgrade and modifications. Including several IT related projects of network infrastructure upgrade. Also managed several projects that where major demolition of abandon equipment and structures. My duties included combination of design and project management along with coordination of design/engineering services and project planning implementing. construction activities on the job sites.

### CFO for Startup

Assign the reasonability to setup and document the auditing and reporting management systems for trucking company startup. Development and managed all the computer systems. Created definitions of corporate standards for operation and auditing in coordination with corporate accounting services. The computer management system required the design, development and installation of network system, custom software for the company's operation and production reports. The development of safety and health policies, procedures for office operational management systems, and document retention.

### Senior Designer

Working for a stable of eight engineers and on over 220 design projects as senior designer for major plant expansion of \$16m for building and process expansion. These design projects included the use of Autocad and supporting network system. Developed a Project Management program taking a manual ledger method of project accounting to database system, reducing the reporting time of project spending to 1 week. The designs included conveying systems, process systems upgrades, packaging, and new processing systems. Which included all the supporting controls and power systems included coordinating with control groups for final mechanical system designs. Worked with site management teams to develop CAB and 5 years business strategy documentation. During this time designed, assembled, and installed a management side network systems interfacing with business systems for a casino locating in Greenville, MS.

## EDUCATION

**Corporate Safety Training**  
2017

**Washington County**  
1990

**Richardson Estimating**  
1985

**Lamar University**  
1977

### Corporate Safety Training

Training in global safety standards for plant construction management and risk analysis and field review procedures.

### Washington County

Networking development with local and state wide business leaders to develop a plan for parks and wild life additional funding for development for public access to local parks.

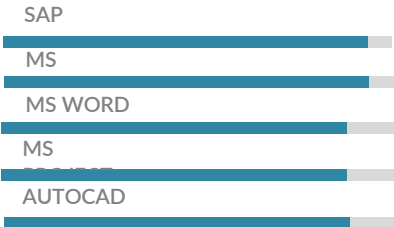

### Richardson Estimating School

This started the beginning of the many project conceptions and implementations.

### A.A.S Design Technologies

Starting point to life completing this study program.
